

Dr. Luigi CREMA

Member of the Clean Hydrogen Partnership Governing Board

President, Hydrogen Europe Research

Director, Center for Sustainable Energy, Fondazione Bruno Kessler (Trento)

Founder and Member, Accademia di Ingegneria e Tecnologia (Italy)

Vicepresident, Italian Hydrogen Association, H2IT (Italy)

Member of the Scientific Committee, Green Energy Storage (Italy)

Luigi Crema is the director of the Center for Sustainable Energy at Fondazione Bruno Kessler, in Trento. A physicist, he deals with issues connected with energy transition and the development of technology solutions for hydrogen and batteries, the two main pillars of the Center with about 40 between researchers, innovators and technicians. He was involved in more than 40 project initiatives on the energy sector and in more than 100 scientific papers.

He is the vice president of the Italian Hydrogen Association, supporting the role of hydrogen at the national scale and through the engagement of national institutions. For over twenty years, he has been involved in innovation between research and the industrial sector, with experience on how to transform development areas into viable solutions and economic value.

He supported the creation and growth of Start-up such as Green Energy Storage and Unitec.
