

**FCH JU evaluation results / opening of negotiations**  
**For approval by the Governing Board**

**Call for Proposals FCH-JU-2009-1**  
**Deadline 15 October 2009**

The second Call for Proposals (FCH-JU-2009-1) of the Fuel Cell and Hydrogen Joint Undertaking (FCH JU) was published in the Official Journal of the European Communities on 2 July 2009<sup>1</sup> and closed on 15 October 2009.

The indicative budget for the Call is 71.3 M€ (increased by the EFTA contributions amount to 72.970.240 €).

According to Article 16 of the FCH JU Regulation<sup>2</sup> the Commission shall be responsible for the establishment and initial operation of the FCH JU. Therefore, the second Call for proposals was managed by Commission officials and the infrastructure used for submission of proposals was the one of the Commission.

50 proposals were received by the Commission. All proposals were checked for eligibility before evaluation process. Pending for decision on this aspect, the 50 proposals were evaluated following the procedure foreseen in the FCH JU Rules for submission of proposals and the related evaluation, selection and award procedures. One proposal was declared ineligible at the end of evaluation process (256842, TRIGEN) due to the fact that none of the applicants/participants were members of any IG/RG at the call closure date.

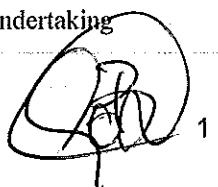

The FCH-JU's provisional ranked lists of proposals considered for funding and reserve lists are presented in Annex 1 and Annex 2 respectively. In Annex 3, the FCH-JU provisional rejection lists are presented. Annex 4 is presenting the list of ineligible proposals.

Following the evaluation, the Commission finalised the evaluation results by taking into account the available budget and the matching principles, in particular by reviewing the financial information for all 31 proposals above the thresholds. This has implied an intermediary step in which the applicants were requested to clarify all financial figures provided in the proposals. These clarifications resulted in increases of actual declared indirect costs and therefore of the total costs in most of the projects.

During this clarification step, one proposal was withdrawn (256860, CARMEN), for the reason that it was presented as a resubmission of the proposal 245339 - LOLIPEM which has in the mean time been successfully negotiated and a contract has been signed in December 2009, from the reserve list of the first call. The proposal CARMEN is therefore included in the rejection list (Annex 3).

<sup>1</sup> OJ C150 of 02/07/2009

<sup>2</sup> Council Regulation (EC) No 521/2008 of 30 May 2008 setting up the Fuel Cells and Hydrogen Joint Undertaking

Based on the evaluation results, and taking into consideration the available budget, in particular to comply with the matching principles referred to in Art.12(3) of the FCH JU Statutes (the industry shall at least match the Community's contribution) a maximum financial contribution from the FCH JU is recommended for each of these proposals.

At this stage, simulations show that the situation is rather unbalanced with regard to matching for the whole portfolio of 30 projects which passed the thresholds in the second call for proposals. Moreover, a mismatch of 5.776.491 Euro (4.154.491 Euro as difference between FCH funding and industry in-kind contribution + receipts from public sources to the industry participants in the projects of 1.622.000 Euro) was carried over from the first call and should be corrected in this call.

Therefore, in order to rebalance the matching for this call and for the whole programme, it is proposed to reduce proportionally the maximum funding rates by a correction factor of 0.6677. This results in the following funding rates:

- For the Collaborative Projects (CP) - RTD activities, the proposed upper funding limits are therefore approximately 33% of direct eligible costs for large industrial participants and 50% of direct eligible costs for SMEs, non-profit public bodies, universities, higher education establishments and non-profit research organisations.
- For the Collaborative Projects (CP) - Demonstration activities, the proposed upper funding limits are therefore approximately 33% of direct eligible costs for all type of participants.
- For Collaborative Projects (CP) – Other activities, the proposed upper funding limits are therefore approximately 67% of direct eligible costs for all type of participants.

For the Coordination and Support Actions (CSA) no decrease has been applied and the upper funding limit is 100% of direct eligible costs, for all types of participants. This option is in line with the orientation given by the Governing Board in the meeting of 15 May 2009 to increase the funding limits for the CSA from 50% (in the call 2008) to 100% (in the call 2009) following the non-response to the CSA topics in the 2008 call. Moreover, based on the experience of 2008 call, decreases in funding rate for the CSA may cause the CSA proposals under call 2009 to withdraw and discourage future participation in the topics supported by the CSA funding scheme.

After decreases have been applied, 26 proposals above thresholds and within the coverage of Annual Implementation Plan 2009, could be supported within the 2009 budget appropriations (72,970.240 €) for an amount of 71.930.239 €. The 4 remaining proposals above thresholds are in the reserve lists.

The remaining budget is not sufficient to support any of the proposals from the reserve lists. If any additional budget will become available as a result of the negotiation phase, the first proposal to be taken out of the reserve lists will be 256798 – PEMICAN (presently on the reserve list of "Transportation and Refuelling Infrastructure" Area) – see arguments below.

Proposals are ranked in priority order according to the evaluation results. The final list of proposals for possible funding from those that passed the evaluation thresholds has been defined on the basis of the results of the evaluation by experts, for each Application Area.

However, based on these lists and budget availability for each of the Application Areas, it is proposed to support the proposal ranked as 2<sup>nd</sup> under the Area "Transportation and Refuelling Infrastructure" (namely proposal 256773 – HyQ) and to leave the last proposal (ranked as 15<sup>th</sup>) under the Area "Stationary Power Generation & CHP" (256713 – POC-4-APEM) in the reserve list. Moreover, if additional budget will become available during negotiations phase, the proposal ranked as 3<sup>rd</sup> under the Area "Transportation and Refuelling Infrastructure" (namely 256798 – PEMICAN) should be invited to negotiate from the reserve lists, due to the following reasons:

- Annual Implementation Plan 2009 coverage: the topic 3.5 addressed by the proposal POC-4-APEM is already covered by two other better ranked proposals in the list for Area "Stationary Power Generation & CHP" (proposals 256764 – Asterix3 and 256694 – LOTUS). However, the

topic 1.6 (addressed by proposal HyQ) and topic 1.3 (addressed by proposal PEMICAN) will not be addressed by other proposals.

- Overall score of proposals: both proposals (HyQ and PEMICAN) in the Area "Transport and Refuelling Infrastructure" have an overall score of 12, much better than the overall score of 10 for proposal POC-4-APEM.

The matching situation before starting negotiations with the proposals from the second call, including data from signed contracts in the first call and proposals submitted in the second call is as following:

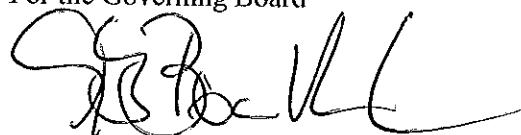

Total costs €	FCH JU recommended funding €	in-kind contribution industry (considered for matching) €	Other contributions / public funds €	Matching (difference in matching from the industry) €	
				Other contributions (public funds) <u>not included</u>	Other contributions (public funds) <u>included</u>
<i>call 2008 (16 contracts)</i>					
61.768.807	27.221.604	23.067.113	1.622.000	- 4.154.491	- 5.776.491
<i>call 2009 (26 proposals to negotiate)</i>					
176.829.803	71.930.239	79.739.367	6.646.368	14.455.496	7.809.128
<b>TOTAL</b>	<b>238.598.610</b>	<b>99.151.843</b>	<b>102.806.480</b>	<b>8.268.368</b>	<b>10.301.005</b>
					2.032.637

The FCH JU Governing Board is hereby requested, in order to open the negotiations, to approve the enclosed lists of proposals intended to be selected for funding in the Annex 1, including the suggested correction factor and the resulting financial contribution from the FCH JU for each proposal.

The approval of the FCH JU Governing Board is also requested for the proposals in the reserve list (Annex 2), which will allow for eventualities such as the failure of negotiations on projects or the withdrawal of proposals in the Areas "Transportation & Refuelling Infrastructure" or "Stationary Power Generation & CHP". The same decrease in upper funding limits for the direct costs has been applied, as for the proposals in the ranked lists.

Finally, an approval by the FCH JU Governing Board is requested for the proposals in the rejection lists (Annex 3), which have failed one or more of the thresholds for evaluation criteria and/or have been already financed in the previous call(s), and the ineligible proposal (Annex 4), where none of the applicants were members of any FCH JU Industry Grouping or Research Grouping at the call closure date.

Adopted by the FCH JU Governing Board on 16 April 2010  
For the Governing Board

Gijs van Breda Vriesman  
Chairman
