

Patrick Huber

Member of the Clean Hydrogen Partnership Governing Board

Chairman, H2 Energy Holding AG.

Patrick Huber is the Chairman of H2 Energy Holding AG, a business innovator for renewables with the ambition to play an active role in stopping climate change and establishing hydrogen and fuel cell technology as a key pillar of our energy system. Patrick has joined H2 Energy in 2017 and has been named group CEO in 2018. Since then, H2 Energy has established various Joint Ventures with industry leaders such as Nel ASA, Hyundai Motors, Linde, Alpiq and others. These cooperations enabled the roll-out of the first hydrogen eco-system for serial produced fuel cell trucks. Patrick believes in an eco-system approach for hydrogen solutions and in the importance on the commercial viability and scalability of projects. In 2021 Patrick has been appointed as Chairman of H2 Energy Holding AG and he was elected as a Board Member of Hydrogen Europe in 2020. He has 23 years of Investment Banking experience working for Credit Suisse First Boston and Credit Suisse in London, Frankfurt and Zurich and holds a Master's degree in economics from the University of Zurich. He lives with his family in Zurich, Switzerland.
