

Specific Service Privacy Statement

For data collection through TRUST (Technology Reporting Using Structured Templates) collection platform

This privacy statement explains how the Fuel Cells and Hydrogen 2 Joint Undertaking (here after referred to as FCH 2 JU) uses the personal data you give to us while registering your on-line account for TRUST.

About Trust:

The FCH 2 JU finances research and innovation projects aiming at ultimately bringing fuel cells and hydrogen technologies to market readiness level. To this end, it publishes calls for proposals, manages proposal evaluations and finally monitors project implementation. In view of assessing the effectiveness of its research programme and the needs for further technological developments (to be translated into new calls for proposals), the FCH 2 JU has been mandated to collect data on the concerned technologies in a systematic and uniform way.

This need was identified early after the set-up of the FCH JU and follows the explicit request of the FCH 2 JU governing board, reflecting the will of all 3 members of the FCH 2 JU: the European Commission, Hydrogen Europe, representing the industrial stakeholders and Hydrogen Europe Research, representing the research community.

The data collection is intended to yield comparable data from various projects by unambiguously setting the relevant • parameters • units • validity date (annual granularity)

Data collection is to be performed, as from 2017, through the TRUST (Technology Reporting Using Structured Templates) collection platform. The expected outcome is a coherent and comprehensive vision of the fuel cells and hydrogen sector which is critical for its further development and visibility and for fostering political and financial support.
