

Project Development Assistance for Cities and Regions

Experience in Central-Eastern Europe

25th November 2020

michael.dolman@element-energy.co.uk

#PRD2020
#CleanHydrogen

Objectives

- Introduce the Project Development Assistance (PDA) for Regions initiative
- Provide an overview of projects in Central and Eastern Europe
- Share emerging conclusions from the on-going PDA initiative

The PDA programme provides support to selected cities and builds on the FCH 2 JU's Regions and Cities initiative

2017

May 2017

Launch of FCH 2 JU Regions and Cities initiative

2018

Oct. 2018

Publication of FCH 2 JU Regions and Cities initiative final report

FUEL CELLS AND HYDROGEN
JOINT UNDERTAKING

PROJECT DEVELOPMENT
ASSISTANCE FOR REGIONS

#PRD2020
#CleanHydrogen

2019

Oct. 2019

PDA initiative started

2020

Q1 2020

PDA expression of interest

Q2 2020

PDA for selected regions underway

Mid-2020 to mid-2021

Dedicated support for selected regions + info sharing via Observer Network (all PDA applicants)

2021

2022

2021/22

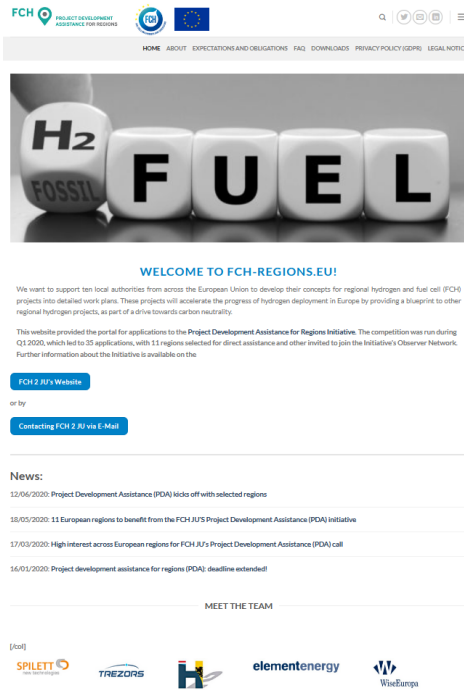

Implementation of projects in supported regions

Public authorities were invited to submit expressions of interest for PDA via a dedicated website in Q1 2020

Criteria included*:

- Existing concepts for a FCH project of expected budget >€5m
- Aim to commence implementation within 12 months of the conclusion of PDA
- Applications from public authorities with willingness and ability to co-finance the project
- Open to public authorities in EU member states and associated countries
- EOIs in English

<https://www.fch-regions.eu/>

* non-exhaustive

We received 35 eligible expressions of interest from countries around Europe, including 12 from CEE countries

Country	Regions
Belgium	Limburg
Bulgaria	Ruse, Sofia
Croatia	Zagreb
Estonia	Tartu
France	Bourgogne-Franche-Comté, Normandie, Région Grand Est, Région Hauts de France
Germany	Dahme-Spreewald, Stadt Aschaffenburg
Greece	Western Macedonia
Hungary	Szentendre
Italy	Emilia-Romagna
Latvia	Jelgava, Riga
Netherlands	Brainport Eindhoven, Midden Noord-Brabant, Texel
Poland	Gdynia
Portugal	Medio Têjo
Romania	Cluj-Napoca, Giurgiu, Iasi, Ramnicu Valcea
Slovakia	Mocenok
Spain	Aragón, Asturias , Cantabria
Sweden	Gävleborg, Mariestad
UK	England: Coventry, Swindon; Scotland: Aberdeen, Orkney Islands

Countries from which applications for PDA were submitted during the expression of interest process (Q1 2020)

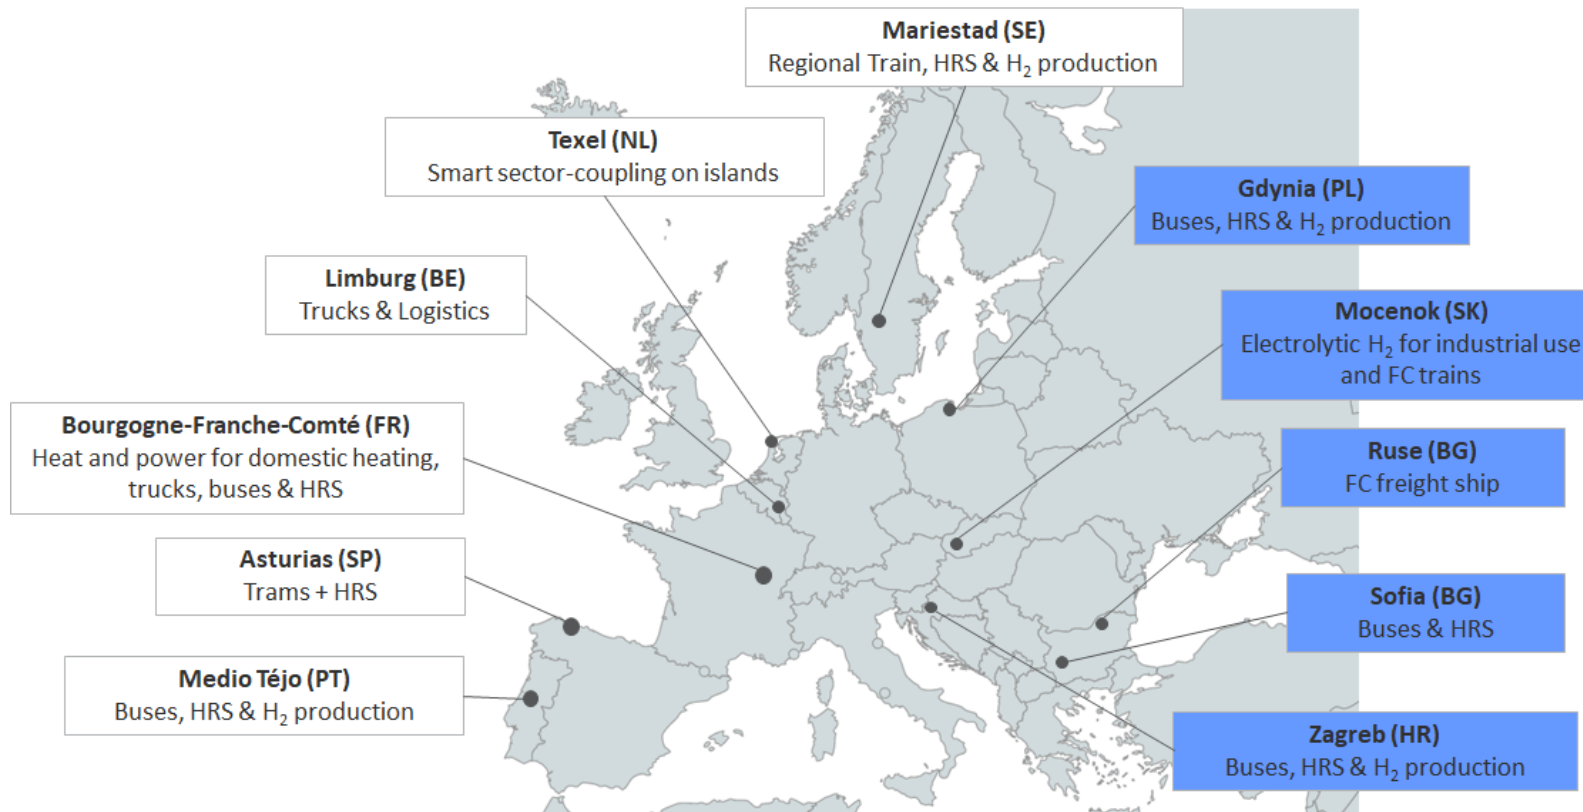

Regions in **bold** were selected to receive Project Development Assistance

#PRD2020
#CleanHydrogen

Eleven regions were selected to receive Project Development Assistance, including five located in CEE countries

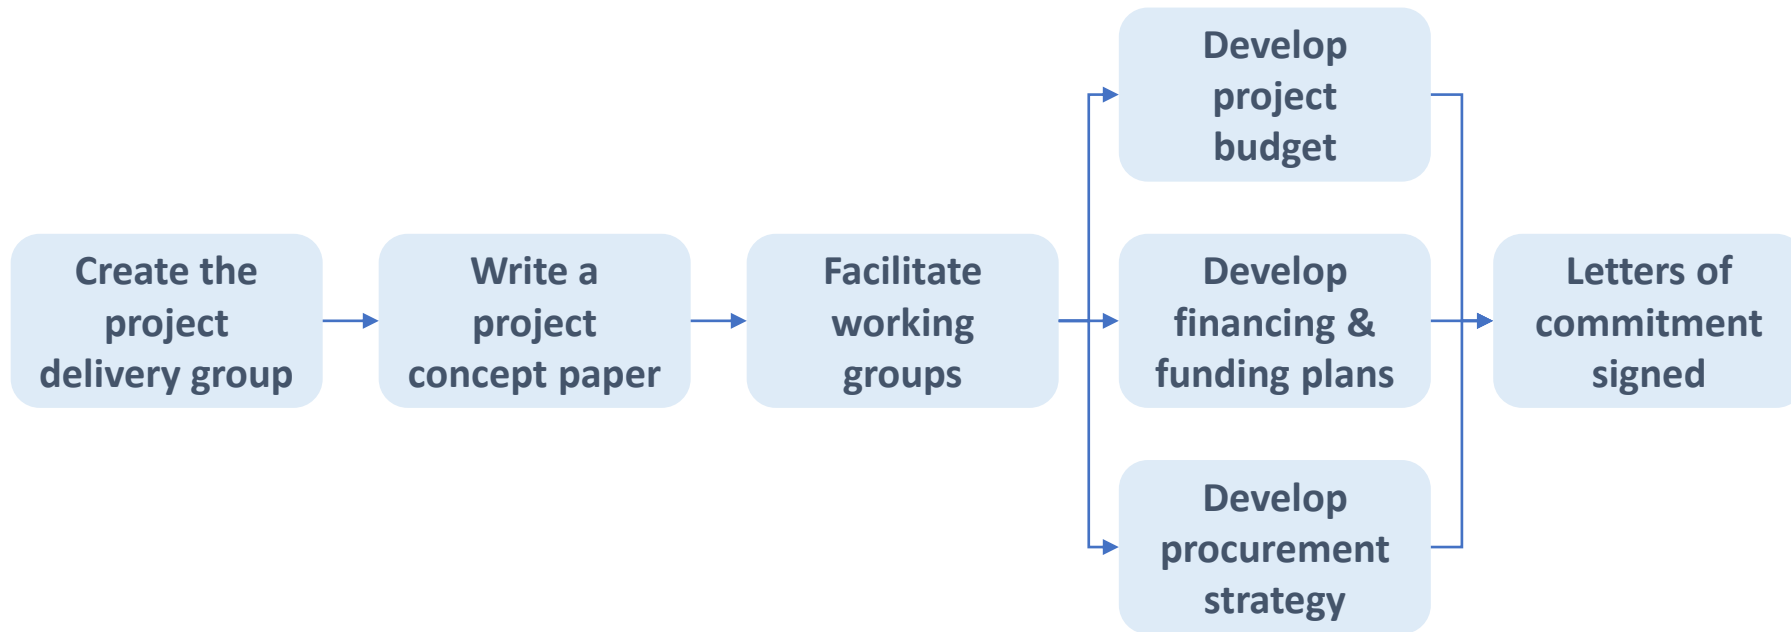

#PRD2020
#CleanHydrogen

With PDA, local project teams are developing budgets, financing & funding plans, and procurement strategies

Overview of general PDA process being followed

PDA in Central and Eastern Europe - emerging conclusions

Various (but common) motivations for interest in HFC deployment

Lighthouse projects - potential to catalyse further roll-out

Expert consultancy support can help shape the projects, provide access to existing resources and knowledge

Strong local buy-in needed to turn plans into reality

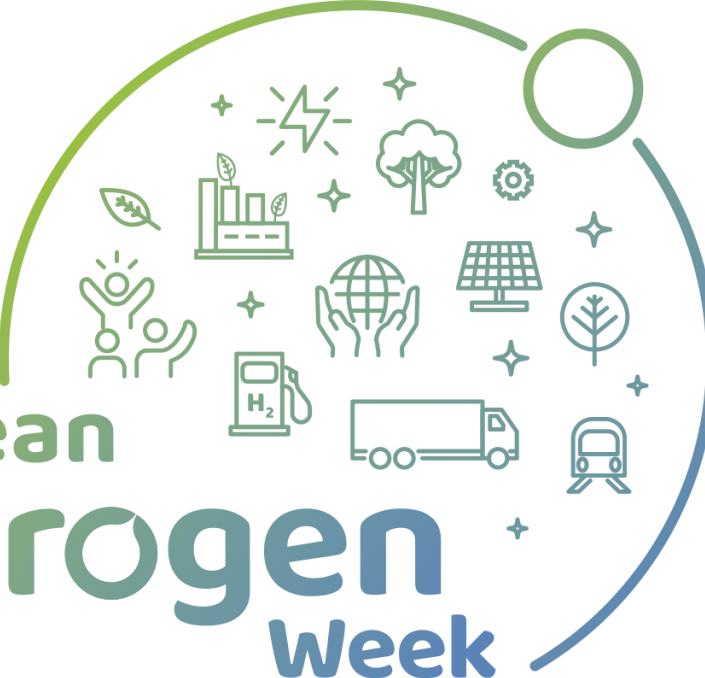

EU funding required in most cases

Potential challenges accessing technologies in markets new for HFC solution providers

HFC expertise does not generally exist within local public authorities - PDA provides a mechanism for supporting development of plans that can contribute towards green growth
