Costs at the proposal stage

Proposal template Part B: technical description (for full proposals: single stage submission procedure and 2^{er} stage of a two-stage submission procedure)

This template is to be used in a single-stage submission procedure or at the 2rd stage of a two-stage submission procedure.

The structure of this template must be followed when preparing your proposal. It has been designed to ensure that the important aspects of your planned work are presented in a way that will enable the cyperis so make an effective assessment against the evaluation criteria. Sections 1, 2 and 3 each correspond to an evaluation criterion.

Please be sware that proposals will be evaluated as they were submitted, rather than on their potential if certain changes were to be made. This means that only proposals that successfully address all the required aspects will have a chance of being funded. There will be no possibility for significant changes to content, budget and consortium composition during grant preparation.

⁴ Page limit: The title list of participants and sections 1, 2 and 3 stipshet should not be longer than 45 pages. All tables, figures, references and any other element pertaining to these sections must be included as an integral part of these sections and are thus counted against this page limit. The number of pages included in each section of this template is only indicative.

The page limit will be applied automatically; therefore you must remove this instruction page before submitting. Remove also the table with the definition of terms and the help text added after each section.

If you attempt to upload a proposal longer than the specified limit before the deadline, you will receive an automatic warring and will be advised to shorter and re-upload the proposal. After the deadline, excess pages (in over-long proposal/sepileations) will be automatically made invisible, and will not be taken into consideration by the expents. The proposal is a self-contained document. Expents will be instructed to ignore hyperlinks to information that is specifically designed to expand the proposal, thus circumventing the page limit.

Please, do not consider the page limit as a target! It is in your interest to keep your text as concise as possible, since experts rarely view unnecessarily long proposals in a possible light.

1 The following formatting conditions apply

The reference for for the body text of proposals is Times New Roman (Windows platforms), Times/Times New Roman (Apple glatforms) or Nimbus Roman No. 9 L (Linux distributions).

The use of a different first for the body text is not advised and is mbject to the cumulative conditions that the fout is bigible and that its use does not significantly shorten the representation of the proposal in number of pages compared to using the reference four (for example with a view to bypass the page limit).

The minimum font size allowed is 11 points. Standard character spacing and a minimum of single line spacing is to be used. This applies to the body text, including text in tables.

Text elements other than the body text, such as headers, foot/end notes, captions, formula's, may deviate, but must be legible.

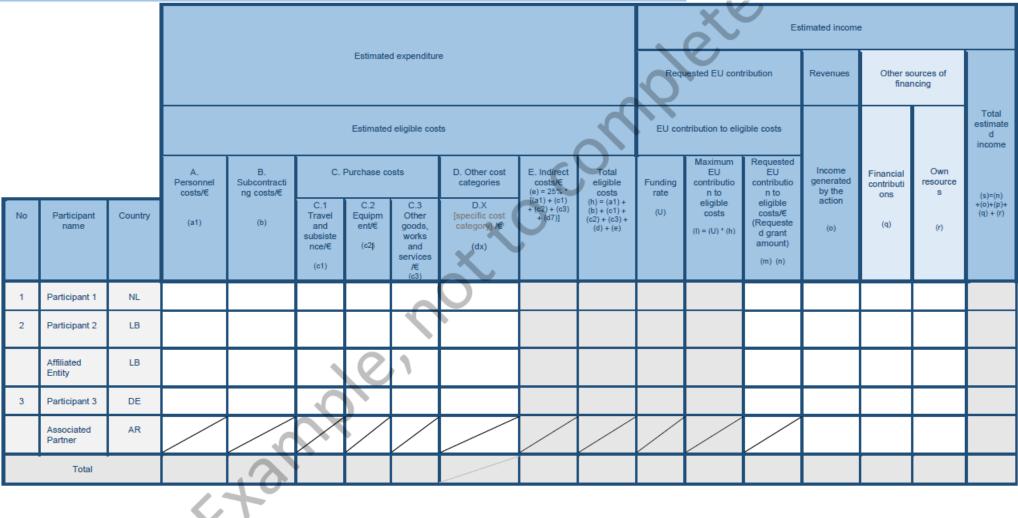

The page size is A4, and all margins (top, bottom, left, right) should be at least 15 mm (not including any footers or headers).
