DECISION OF THE GOVERNING BOARD OF
THE CLEAN HYDROGEN JOINT UNDERTAKING

on the Consolidated Annual Activity Report for 2022 including the corresponding expenditure and on its assessment

THE GOVERNING BOARD OF THE CLEAN HYDROGEN JU:

Having regard to:

Whereas:

(1) Article 17(2)(p) of the Council Regulation provides that the Governing Board shall approve the consolidated annual activity report, including the corresponding expenditure;

(2) Article 20(7)(g) of the Council Regulation provides that the States Representatives Group shall provide an opinion on the consolidated annual activity report;

(3) Article 26(1) of the Council Regulation provides that the Executive Director shall “provide the Governing Board with a consolidated annual activity report on the performance of his or her duties in accordance with the financial rules of the joint undertaking ...”;

(4) Article 26 (2) of the Council Regulation provides the information that the consolidated annual activity report shall include;

(5) Articles 23(1) and Article 23 (2) of the JU Financial Rules provides that the authorizing officer shall report annually to the Governing Board on the performance of his or her duties in the

---

1 OJ L 427, 30.11.2021, p. 17–119
2 FCH-GB-2019-16
form of a consolidated annual activity report […] (which) shall be submitted to the Governing Board for assessment;

(6) Article 23 (3) of the JU Financial Rules further specifies that “No later than 1 July each year the Governing Board shall send the consolidated annual activity report together with its assessment of it to the Court of Auditors, the Commission, the European Parliament and the Council.”;

(7) the States Representatives provided a positive opinion on the Annual Activity Report for 2022 through a letter sent by its Chair to the Executive Director of the Clean Hydrogen JU during its meeting of the 6 June 2023;

(8) A working group set up by the JU Governing Board has analysed the Clean Hydrogen JU Annual Activity Report 2022;

HAS ADOPTED THE FOLLOWING DECISION:

Article 1

The Governing Board of the Clean Hydrogen JU adopts its assessment of the Consolidated Annual Activity Report for 2022 as attached in Annex 1 to this Decision, and approves the Clean Hydrogen JU Annual Activity Report for 2022 as attached in annex 2 to this Decision.

Article 2

The Clean Hydrogen JU Consolidated Annual Activity Report for 2022 including its assessment shall be made publicly available on the website of the Clean Hydrogen JU.

Article 3

This Decision shall enter into force on the day following that of its adoption.

Brussels, 29 June 2023

On behalf of the Governing Board

Chair of the Governing Board of the Clean Hydrogen JU

Annexes: 1. Assessment of the Clean Hydrogen Joint Undertaking Consolidated Annual Activity Report (CAAR) for 2022 by the JU Governing Board
2. Consolidated Annual Activity Report (CAAR) for 2022 of the Clean Hydrogen JU
1 INTRODUCTION

Hydrogen-related technologies are critical for the achievement of the EU’s climate and energy goals. The Clean Hydrogen JU, in its Annual Activity Report for 2022, demonstrated this by:

- The adoption of the new strategic research and innovation agenda in collaboration with the European Commission, Hydrogen Europe and Hydrogen Europe Research, to be implemented over the period from 2021 to 2031,
- The organisation of the first call for proposals under Horizon Europe on Hydrogen in 2022 for an amount of EUR 300 million,
- The continued programme implementation activities through the management of 154 grants resulting from calls for proposals under Horizon 2020 over previous years and the call for proposals under Horizon Europe in 2022,
- The organisation of the governance of the JU pulling together the stakeholders of the hydrogen sector in accordance with the requirements of the founding regulation,
- The organisation of the third edition of the European Hydrogen Week and other impacting communication activities.

The portfolio of 154 projects is composed of research and demonstration activities aimed to develop and deploy products and technologies covering the full spectrum of the hydrogen value chain, from production and storage to distribution and end use in energy and transport. The projects range from long-term innovative research through development and large-scale demonstration projects.

The year 2022 was the first year of operation of the new partnership with a total budget of EUR 1 billion which was topped up in May 2022 with an additional amount of EUR 200 million dedicated to the deployment of hydrogen valleys. These projects aim to develop a local ecosystem of hydrogen production plants, storage, distribution and end users.

In addition to the contribution of the EU of EUR 0.7 billion; industry and research members made in-kind contributions for a value of EUR 1.1 billion for H2020\(^3\) and of EUR 0.5 billion for Horizon Europe\(^4\). By combining committed EU and private funds in the JU actions, at the end of 2022, a total EUR 2.3 billion programme can be observed, which means a combined leverage effect of 2.3\(^5\).

Budget execution reached 99% in terms of commitment appropriations, recording the best performance in the JU’s history, and 65% in terms of payment appropriations, a low execution rate mainly due to the pre-financing in early 2023 for which the appropriations were part of the 2022 budget.

\(^3\) Certified values as at 31 December 2022
\(^4\) Committed values as at 31 December 2022
\(^5\) EUR 1.6 billion of industry and research members in-kind contributions compared to EUR 0.7 billion of EU contribution in 154 projects
2. **ANALYSIS**

The Clean Hydrogen Joint Undertaking’s Consolidated Annual Activity Report for 2022 (Authorising Officer’s report) was sent to the JU Governing Board on 25 May 2023 and will be submitted for approval by the Governing Board before the end of June 2023. The Governing Board is of the opinion that the Clean Hydrogen JU’s CAAR for 2022 adequately covers the main activities of the JU in 2022, identifies the risks associated with the JU operations, duly reports on the use made of the JU resources provided, and indicates the efficiency and effectiveness of the Clean Hydrogen JU’s internal control system.

The Governing Board recognizes the continuous progress made by the Clean Hydrogen JU and the results achieved in year 2022 and positively notes in particular the following elements:

2.1 **Governance**
- The Governing Board congratulates the Clean Hydrogen JU for its efforts in the organisation of the governance and advisory bodies in compliance with the provisions of the founding regulation, which have resulted in the identified bodies being effectively put in place and acting.

2.2 **Operations**
- The Governing Board is pleased to note the high level of contributions, significantly achieving the set targets, from Members other than the Union for both H2020 and Horizon Europe programmes, or their constituent or affiliated entities, in the form of in-kind contributions to projects and through additional activities.
- The Governing Board takes note of the good budget execution level, 99% for Commitment Appropriations, and takes note of the explanations related to low 65% execution rate for Payment Appropriations.
- The Governing Board takes note of the early adoption of the Strategic Research and Innovation Agenda for the upcoming period, and congratulates the JU and stakeholders involved for this major achievement.
- The Governing Board congratulates the Clean Hydrogen JU for the launch of the call for proposals for a total value of EUR 300 million in the beginning of the year and the signature of the first 20 grants before the end of the year, which results from an intense preparatory work. This paves the way for a new decade of reinforced investment in research and innovation on hydrogen, with already 30% of the total budget committed.

2.3 **Communication**
- The Governing Board congratulates the JU and its partners for the organisation of the Hydrogen Week as an integrated event, with exhibition and conferences together showcasing products and solutions, addressing political messages and vision, and presenting research projects and achievements.
- The Governing Board takes note of the efforts of the JU in the areas of public awareness and social media monitoring and publications, and encourages the JU to further develop these activities.

2.4 **Risk management**
- The Governing Board is satisfied with the risk management actions, takes note of the major risks identified and encourages the JU and stakeholders to implement the identified mitigation measures.

2.5 **Human resources**
- The Governing Board congratulates the JU for its effort on recruitment and on professional and personal development.
2.6 Internal control system
- The Governing Board is pleased that the implementation by Clean Hydrogen JU of the Internal Control Framework and related principles has had a positive impact and has supported the JU in its efforts to achieve its objectives.
- The Governing Board trusts that the necessary controls and monitoring mechanisms are in place to ensure that all errors detected are timely and effectively corrected.

3 CONCLUSION
The declaration of the Executive Director and the Clean Hydrogen JU’s CAAR for 2022 give a fair assessment of operational and financial management needed for achieving the objectives. Based on the information provided, the JU key objectives set up for 2022 have been met in compliance with the principles of legality and regularity of operations.

The Governing Board notes that the management of the Clean Hydrogen JU has reasonable assurance that, overall, suitable controls are in place and working as intended, risks are being properly monitored and mitigated. Therefore, the Executive Director ad interim, in her capacity as Authorising Officer, has signed the Declaration of assurance without any reservation.

The Governing Board thanks Mr. Bart Biebuyck, Executive Director of the JU until May 2023, for his continuous effort to deliver the JU’s work programmes over years since 2016, and for his achievements and major contribution to developing Hydrogen in the European Union.
ANNEX 2

Consolidated Annual Activity Report (CAAR) for 2022 of the Clean Hydrogen JU
