

Glenn LLEWELLYN

Member of the Clean Hydrogen Partnership Governing Board

Vice President, Zero-Emission Aircraft, at Airbus

Glenn Llewellyn is at the helm of a zero-emission revolution at Airbus with the mission to unite all the ingredients needed to launch the world's first zero-emission commercial aircraft programme. Recognising the need for cross-industry synergies, he has been instrumental in forging some of the forward-looking partnerships necessary to achieving Airbus' ambitious vision with a variety of aviation and technology leaders.

Prior to his current role, Glenn led the research & technology portfolio dedicated to reducing the climate impact of Airbus products. This portfolio included ground-breaking demonstrator projects such as the all-electric VTOLs – Vahana and CityAirbus – as well as the hybrid-electric E-Fan X.
